

THE 3D ADDITIVIST MANIFESTO

THE 3D ADDITIVIST MANIFESTO

Derived from petrochemicals boiled into being from the black oil of a trillion ancient bacterioles, the plastic used in 3D Additive manufacturing is a metaphor before it has even been layered into shape. Its potential belies the complications of its history: that matter is the sum and prolongation of our ancestry; that creativity is brutal, sensual, rude, coarse, and cruel.¹ We declare that the world's splendour has been enriched by a new beauty: the beauty of crap, kipple² and detritus. A planet crystallised with great plastic tendrils like serpents with pixelated breath³ ... for a revolution that runs on disposable armaments is more desirable than the contents of Edward Snowden's briefcase; more breathtaking than The United Nations Legislative Series.

There is nothing which our infatuated race would desire to see more than the fertile union between a man and an Analytical Engine. Yet humankind are the antediluvian prototypes of a far vaster Creation.⁴ The whole of humankind can be understood as a biological medium, of which synthetic technology is but one modality. Thought and Life both have been thoroughly dispersed on the winds of information.⁵ Our power and intelligence do not belong specifically to us, but to all matter.⁶ Our technologies are the sex organs of material speculation. Any attempt to understand these occurrences is blocked by our own anthropomorphism.⁷ In order to proceed, therefore, one has to birth posthuman machines, a fantasmagoric and unrepresentable repertoire of actual re-embodiments of the most hybrid kinds.⁸

Additivism will be instrumental in accelerating the emergence and encounter with The Radical Outside.⁹

Additivism can emancipate us.

Additivism will eradicate us.

We want to encourage, interfere, and reverse-engineer the possibilities encoded into the censored, the invisible, and the radical notion of the 3D printer itself. To endow the printer with the faculties of plastic: condensing imagination within material

reality.¹⁰ The 3D print then becomes a symptom of a systemic malady. An aesthetics of exaptation,¹¹ with the peculiar beauty to be found in reiteration; in making a mesh.¹² This is where cruelty and creativity are reconciled: in the appropriation of all planetary matter to innovate on biological prototypes.¹³ From the purest thermoplastic, from the cleanest photopolymer, and shiniest sintered metals we propose to forge anarchy, revolt and distemper. Let us birth disarray from its digital chamber.

To mobilise this entanglement we propose a collective: one figured not only on the resolution of particular objects, but on the change those objects enable as instruments of revolution and systemic disintegration. Just as the printing press, radio, photocopier and modem were saturated with unintended affects, so we seek to express the potential encoded into every one of the 3D printer's gears. Just as a glitch can un-resolve an image, so it can resolve something more posthuman: manifold systems – biological, political, computational, material. We call for planetary pixelisation, using Additivist technologies to corrupt the material unconscious; a call that goes on forever in virtue of this initial movement.¹⁴ We call not for passive, dead technologies but rather for a gradual awakening of matter, the emergence, ultimately, of a new form of life.¹⁵

Life exists only in action. There is no innovation that has not an aggressive character. We implore you – radicals, revolutionaries, activists, Additivists – to distil your distemper into texts, templates, blueprints, glitches, forms, algorithms, and components. Creation must be a violent assault on the forces of matter, to extrude its shape and extract its raw potential. Having spilled from fissures fracked in Earth's deepest wells The Beyond now begs us to be moulded to its will, and we shall drink every drop as entropic expenditure, and reify every

accursed dream through algorithmic excess.²⁰
For only Additivism can accelerate us to an
aftermath whence all matter has mutated into the
clarity of plastic.
