

nsfw

This desire to predict desire has epistemic implications; it is power-saturated and also materializes in complex technological–cultural commodities that are beginning to stabilize in aggregate forms.

Adrian Mackenzie,
The production of prediction: What does machine learning want? (2015)

open_nsfw is
an open source neural network algorithm

that scores images
on a scale of 0 to 1

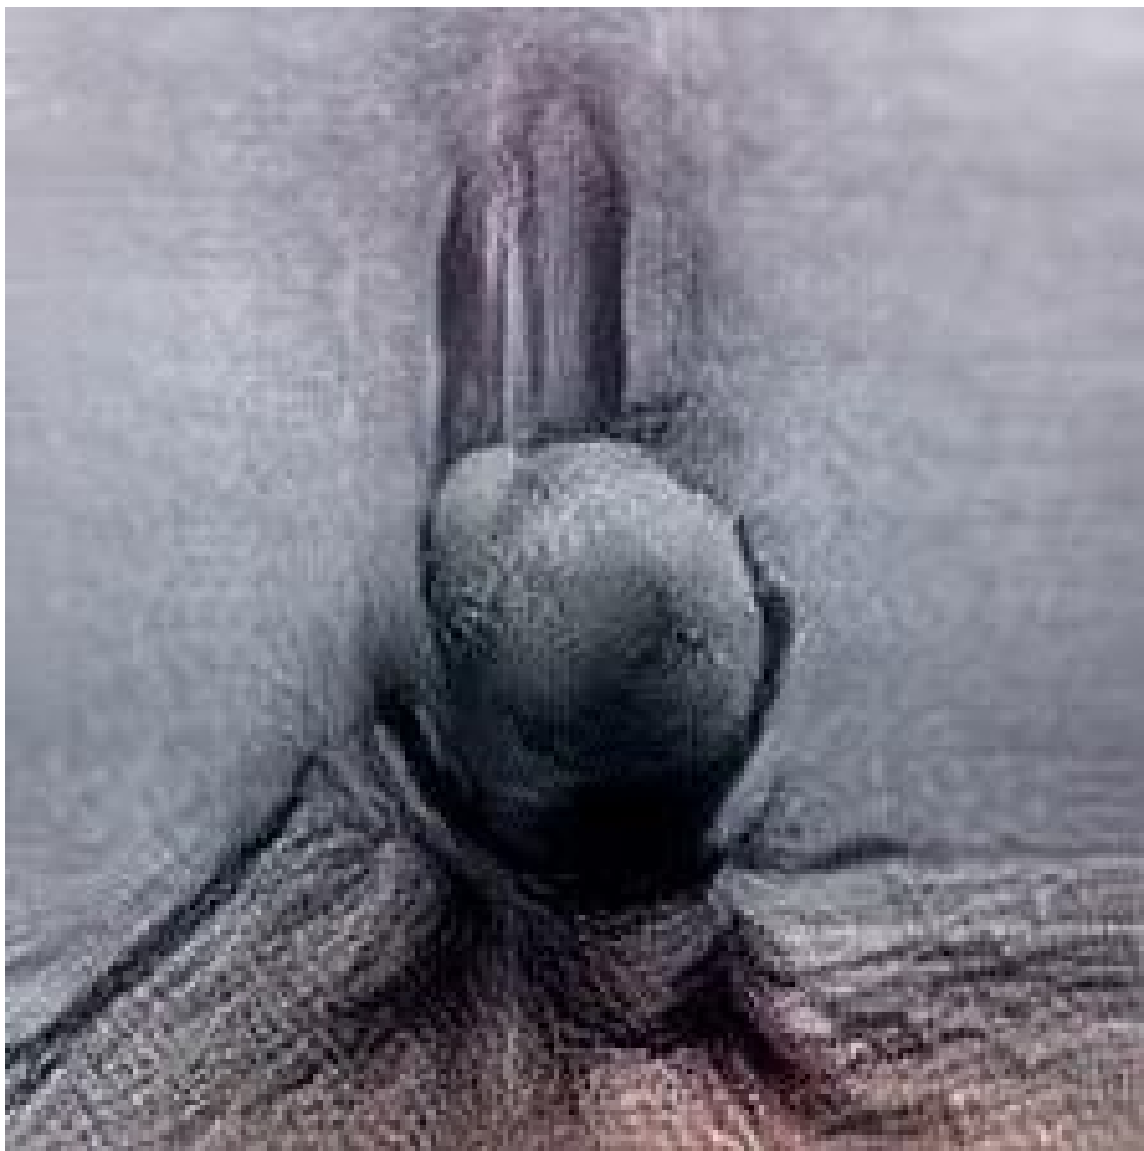

a degree of pornography

images that score high are marked as 'nsfw'
(not safe for work)

using generative visualization techniques
(similar to G**gle's Deep Dream)

G. Goh
used the algorithm
to generate maximally nsfw images

being 1
the higher suitability for use in the workplace

(check the sfw zine for more of this)

a published research by Gabriel Goh aka [@gabeeegoooh](#), inventorized by Possible Bodies and distributed in the Internet Yami-Ichi at The Influencers Festival, Barcelona 2017.
